

SwitchBlade® x908 Generation 2

High Capacity Stackable Layer 3+ Modular Switch

The Allied Telesis SBx908 GEN2 is the ideal solution for the modern enterprise network core. This stackable modular switch also has the capacity to support Smart City and IoT networks.

The SBx908 GEN2 delivers a futureproof network with superior flexibility, and integrated wireless management.

The high-capacity 2.6 Terabit fabric eliminates bottlenecks, effortlessly streams video and ensures all traffic in large networks is delivered reliably. Flexible hot-swappable expansion modules (XEMs) support multi-speed (1/2.5/5/10G), 10 Gigabit, 40 Gigabit, and 100 Gigabit to easily expand the SBx908 GEN2 to meet network traffic demands, both now and well into the future.

Smart City and IoT networks

The SBx908 GEN2 has large switching and routing tables to support Smart City networks and the Internet of Things (IoT). It meets the increasing demand for the convergence of multiple services, like video surveillance, public Wi-Fi, information kiosks, environmental sensors and more.

Network automation

Allied Telesis Autonomous
Management Framework™ Plus (AMF
Plus) meets the increasing management
requirements of modern converged
networks, by automating many everyday
tasks. AMF Plus has powerful features
that allow an entire network to be easily
managed as a single virtual device.

Vista ManagerTM EX is an intuitive graphical tool for monitoring and managing AMF Plus wired and Autonomous Wave Control (AWC) wireless devices. Full visibility and powerful features enable proactive management of large networks.

Device and network management

The Device GUI on the SBx908 GEN2 enables graphical monitoring of key switch features to support easy management.

Integrated into the Device GUI, Vista Manager mini supports visibility and management of AMF Plus wired and AWC wireless network devices, making it ideal as a one-stop solution for small to medium-sized networks. AWC is an intelligent, easy to use Wireless LAN

controller that automatically maintains optimal wireless coverage. Vista Manager mini includes AWC floor and heat maps showing wireless coverage. It also supports AWC Channel Blanket hybrid operation, providing maximum performance and seamless roaming, as well as AWC Smart Connect for simplified deployment, and a resilient Wi-Fi network solution using wireless uplink connectivity.

Resilient

The convergence of network services in the enterprise has led to increasing demand for highly available networks with minimal downtime. Allied Telesis Virtual Chassis Stacking (VCStack™), in conjunction with link aggregation, provides a network with no single point of failure and a resilient solution for high-availability applications. The SBx908 GEN2 can form a VCStack of up to four units, at any port speed, for enhanced resiliency and simplified device management. Stacks can also be created over long distance fiber links, making it the perfect choice for distributed environments too.

Allied Telesis Ethernet Protection Switched Ring (EPSRing™), G.8032 Ethernet Ring Protection, and Media Redundancy Protocol (MRP) ensure that distributed ring-based network segments have resilient access to online resources.

Reliable

Designed with reliability in mind, the SBx908 GEN2 guarantees the continual delivery of essential services. Hot-swappable components such as XEMs, fans, and load-sharing Power Supply Units (PSUs) pair with near-hitless online stack reconfiguration, to ensure that maintenance doesn't affect network uptime.

Environmentally friendly

The SBx908 GEN2 supports Energy Efficient Ethernet (EEE), automatically reducing the power consumed by the switch whenever there is no traffic on a port, reducing operating costs.

Key Features

- ▶ 2.6 Terabit fabric
- ▶ 10G, 40G, 100G XEMs
- ► Multi-speed (1/2.5/5/10G) XEMs
- ► Allied Telesis Autonomous Management FrameworkTM Plus (AMF Plus)
- ► AMF Security compatible
- ► Active Fiber Monitoring of fiber data and stacking links
- ► OpenFlow v1.3 for SDN
- ► Large switching and routing tables
- ► VCStack[™] up to 4 units, locally or over distance
- ► EPSRingTM and G.8032 ERPS for resilient rings
- ► EPSR Master
- ► Media Redundancy Protocol (MRP)
- Media Access Control Security (MACSec)
- Multicast Source Discovery Protocol (MSDP)
- ► Link Monitoring
- ► Bidirectional Forwarding Detection (BFD)
- ► Upstream Forwarding Only (UFO)
- ▶ VXLAN static tunnels
- ► AT-Vista Manager mini enables:
 - ▶ Wired and wireless network visibility
 - ► AWC wireless network management
 - ► AWC-Channel Blanket hybrid wireless
 - ► AWC-Smart Connect wireless uplinks
- ► FIPS 140-2 certified
- ► Precision Time Protocol (PTP) Transparent Mode
- ► NETCONF/RESTCONF with YANG data modelling

Key Features

VCStack™

Create a VCStack of up to four units at any port speed. Stacking links are connected in a ring so each device has dual connections to further improve resiliency. VCStack provides a highly available system where network resources are spread out across stacked units, reducing the impact if one of the units fails. Aggregating switch ports on different units across the stack provides excellent network resiliency.

VCStack LD

Long-distance stacking allows a VCStack to be created over fiber links to span longer distances, perfect for a distributed network environment.

Vista Manager mini

▶ Integrated into the Device GUI, Vista Manager mini provides full network visibility of AMF Plus wired and AWC wireless devices. Manage and simplify wireless deployment with AWC-Smart Connect, and support optimal wireless performance from AWC hybrid operation with maximum throughput and a seamless Wi-Fi user experience.

Allied Telesis Autonomous Management Framework™ Plus (AMF Plus)

- AMF Plus is a sophisticated suite of management tools that provide a simplified approach to network management. Common tasks are automated or made so simple that the everyday running of a network can be achieved without the need for highly-trained, and expensive, network engineers. Powerful features like centralized management, auto-backup, auto-upgrade, auto-provisioning and auto-recovery enable plug-and-play networking and zero-touch management.
- ➤ The SBx908 GEN2 operating as the AMF Plus master stores firmware and configuration backups for all other network nodes. This enables auto-provisioning and auto-upgrade by providing appropriate files to new network members.
- ➤ The SBx908 GEN2 provides a single-pane-of-glass interface to the entire network. Administrators can view the topology map using the intuitive Device GUI.
- ➤ An AMF Plus license (from AW+ version 5.5.2-2 onwards) provides all standard AMF network management and automation features, and also enables the AMF Plus intent-based networking features menu in Vista Manager EX (from version 3.10.1 onwards).

AWC Wireless Management

- Optimize wireless network performance with the Autonomous Wave Controller (AWC), built-in to the SBx908 GEN2. AWC analyzes wireless traffic patterns and automatically reconfigures access points to meet demand.
- Wireless network operation in multi-channel, single-channel (Channel Blanket), and hybrid (multichannel and Channel Blanket) modes, supports maximum data throughput and seamless roaming for the most flexible wireless solution available.
- AWC-Smart Connect (AWC-SC) enables plug-and play wireless network growth, as new APs only need a power connection, and will then automatically create resilient wireless uplink connections to other APs.

AMF-Security and Application Proxy

➤ The AMF-Security (AMF-Sec) solution enables internal LAN threat detection and automatic end-point isolation to protect the network. The AMF Application Proxy (included for free in the base license) enables the AMF-Sec controller to communicate with the AMF Plus master when a threat is detected, so the AMF Plus master can take action to block the threat at source by quarantining the infected end-point.

Large Network Tables

▶ High-capacity 2.6 Terabit fabric and 1,905Mpps packet forwarding provide powerful data transfer capability, supporting large campus networks as well as Smart City and IoT solutions. Large MAC and IP host tables are ready for the increasing number of connected devices found in modern enterprise and city-wide networks.

Multi-speed Ports

Copper ports on the XEM2-12XTm and XEM2-8XSTm expansion modules support 2.5 and 5 Gigabit connectivity to enable high-speed wireless, or maximum downlink speed using legacy Cat5E/6 cabling.

Virtual Routing and Forwarding (VRF-Lite)

- ▶ VRF-Lite provides Layer 3 network virtualization by dividing a single switch into multiple independent virtual routing domains. With independent routing domains, IP addresses can overlap without causing conflict, allowing multiple customers to have their own secure virtual network within the same physical infrastructure. VRF-Lite supports IPv4 and IPv6 unicast and multicast traffic.
- ➤ The built-in DHCP Server on the SBx908 GEN2 is VRF aware, enabling the supply of IP addresses to clients across multiple isolated networks.

EPSRing™

- ► EPSRing allows several switches to form protected rings with 50ms failover—perfect for high performance at the core of Enterprise or Provider Access networks. The SBx908 GEN2 can act as the EPSR Master
- SuperLoop Protection enables a link between two EPSR nodes to be in separate EPSR domains, improving redundancy and network fault resiliency.

G.8032 Ethernet Ring Protection

- G.8032 provides standards-based high-speed ring protection, that can be deployed stand-alone, or interoperate with Allied Telesis EPSR.
- Ethernet Connectivity Fault Monitoring (CFM) proactively monitors links and VLANs, and provides alerts when a fault is detected.

Media Recovery Protocol (MRP)

 MRP enables high-availability automation networks, and is specified for rings with up to 50 devices, where it guarantees fully deterministic switchover behavior.

NETCONF/RESTCONF

 NETCONF/RESTCONF with YANG data modeling provides a standardized way to represent data and securely configure devices.

sFlow

sFlow is an industry-standard technology for monitoring high-speed switched networks. It provides complete visibility into network use, enabling performance optimization, usage accounting/billing, and defense against security threats. Sampled packets sent to a collector (up to 5 collectors can be configured) ensure it always has a real-time view of network traffic.

Precision Time Protocol (PTP)

 PTP (IEEE 1588v2) synchronizes network clocks with micro-second accuracy, supporting industrial automation and control systems. PTP operates on standalone or stacked switches.

Active Fiber Monitoring

Active Fiber Monitoring prevents eavesdropping on fiber communications by monitoring received optical power. If an intrusion is detected, the link can be automatically shut down, or an operator alert can be sent. Active Fiber Monitoring is supported on fiber data and fiber stacking links.

VLAN Translation

- Service Providers can use VLAN Translation to provide customer traffic with a unique VLAN-ID for use within the SP's network. It does this by mapping traffic arriving on a VLAN to a different VLAN on the outgoing paired interface.
- ➤ This feature is also useful in Enterprise environments where it can be used to merge two networks together, without manually reconfiguring the VLAN numbering scheme.

Media Access Control Security (MACSec)

802.1AE MACSec secures all traffic on point-topoint Ethernet links between directly connected nodes, ensuring protection against security threats such as denial of service, intrusion, man-in-themiddle, passive wiretapping, and playback attacks.

Bi-directional Forwarding Detection (BFD)

BFD enables fast detection of link failures, to minimize recovery. It works with static routes, and alongside BGP and OSPF routing protocols supporting faster shutdown of neighbor connections if a peer session goes down. When using VRF-Lite, BFD is supported globally or within a domain.

Upstream Forwarding Only (UFO)

 UFO manages which ports in a VLAN can communicate with each other, and which only have upstream access to services, for secure multi-user deployment.

Multicast Source Discovery Protocol

 MSDP enables two or more PIM-SM (Sparse Mode) domains to share information on active multicast sources, for more efficient forwarding of multicast traffic.

Link Monitoring (Linkmon)

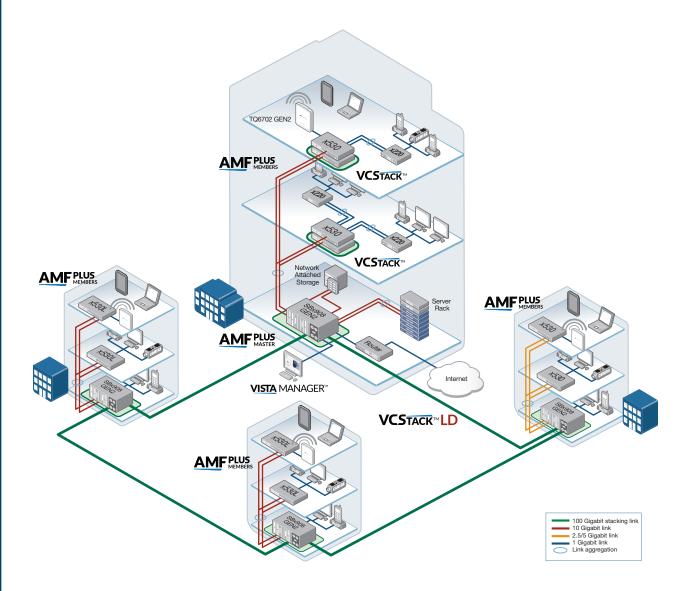

▶ Linkmon enables network health monitoring by regularly sending probes over key links to gather metrics comprising latency, jitter, and probe loss. This supports pro-active network management, and can also be used with triggers to automate a change to device or network configuration in response to the declining health of a monitored link.

Virtual Extensible LAN (VXLAN) tunnels

VXLAN tunnels let you join two or more L2 networks over an L3 IP network to form a single L2 broadcast domain. VXLAN adds scalability to cloud computing environments. The SBx908 GEN2 supports static VXLAN tunnels.

Key Solutions

Distributed network core

Today's large enterprises demand ready access to online resources and applications, and require a high-performing network that can seamlessly carry multiple converged services. This campus solution uses the SwitchBlade x908 GEN2 and VCStack LD—ideal for a distributed network core that provides high availability, increased capacity and ease of management.

Using VCStack at the core of the network allows multiple switches to appear as a single virtual chassis, simplifying management. In normal operation, the full bandwidth of the network is used, ensuring always-available online services. Seamless wireless access, and the convergence of business data, voice, and video surveillance traffic on the network, are easily supported with this powerful solution.

AMF Plus allows the entire network to be unified for ease of management. The SwitchBlade x908 GEN2 acts as the AMF Plus Master, automatically backing up the entire network, and enabling plug-and-play networking with zero-touch expansion and recovery.

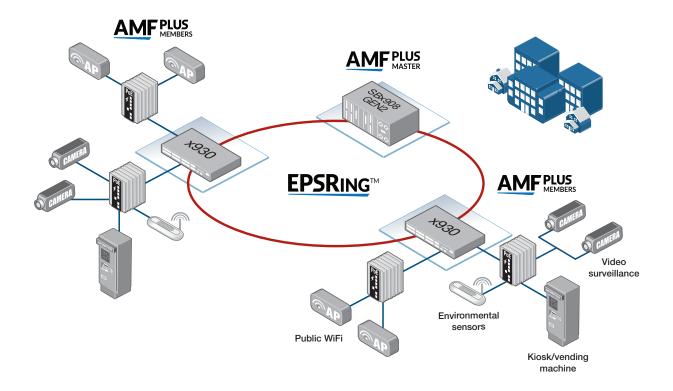

Vista Manager enables visual management and monitoring of the entire network including all wired, wireless, and endpoint devices.

The SwitchBlade x908 GEN2 delivers a protocol-less and Active/Active campus backbone solution, with high performance and flexible scalability.

NETWORK SMARTER SwitchBlade x908 GEN2 | 3

Key Solutions

Smart City network

All over the world, Smart Cities are looking to increase information availability, security and transport efficiency, whilst reducing pollution and waste. Access to real-time data from a variety of sources gives cities the ability to enhance the quality of their urban services, and increase citizen safety.

The SwitchBlade x908 GEN2 is the ideal network core solution for Smart City and IoT networks. Large switching and routing tables support the many devices that make up modern metropolitan networks, including video surveillance cameras, environmental sensors, information kiosks, public Wi-Fi and many more.

EPSR creates a high-speed resilient ring that can utilize 10G, 40G or 100G, and provides extremely fast failover between nodes. EPSR enables rings to recover within as little as 50ms, preventing a node or link failure from impacting the delivery of converged data and video traffic.

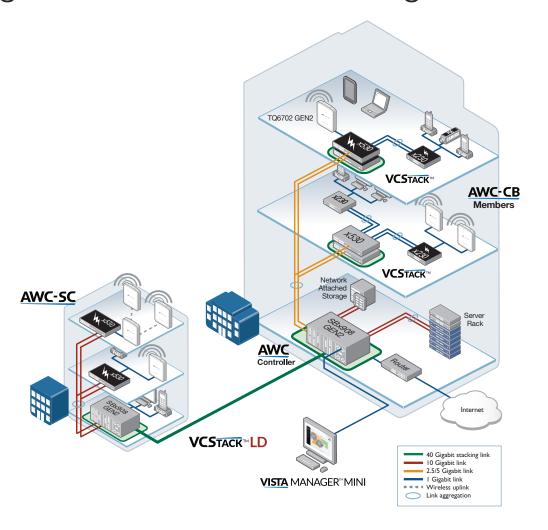

AMF plus automates many day-to-day tasks, backs up the entire network, and provides the ability to configure many or all devices city-wide—with a single command.

The SwitchBlade x908 GEN2 and Allied Telesis advanced features support network managers in delivering leading Smart City services.

4 | SwitchBlade x908 GEN2

Key Solutions

Integrated wireless LAN management

Allied Telesis Autonomous Wave Control (AWC) offers solutions for two of the most common problems with Wireless LANs: initial setup complexity, and on-going performance degradation. Initial WLAN set-up usually requires a site survey to achieve the best coverage, and performance of WLANs can often change over time as external sources of radio interference reduce coverage and bandwidth. These issues can be time-consuming to identify and resolve.

AWC features an intelligent process that automatically recalibrates the signal strength and radio channel of each Access Point (AP) for optimal WLAN performance.

AWC Smart Connect (AWC-SC) uses wireless uplink connections between APs, so deployment is as easy as plugging in and powering on the new APs, which automatically extend the Wi-Fi network, creating a resilient solution.

AWC is integrated into the SwitchBlade x908 GEN2 and provides the ideal solution for modern enterprise networks, enabling management of both the wired (with AMF Plus) and wireless (with AWC) networks to be automated. This reduces both the time and cost of network administration, as well as maximizing network performance for a superior user experience.

Up to five TQ Series wireless APs can be managed for free, and up to a further 300 APs (max 305) with feature licenses, available separately.

On some AP models, hybrid channel blanket enables multi-channel and single-channel WiFi operation simultaneously. This supports seamless roaming and maximum throughput. Channel Blanket licenses are available for up to 300 APs. For plug-and-play wireless deployment AWC-SC licenses are available for up to 300 APs.

NETWORK SMARTER SwitchBlade x908 GEN2 | 5

Specifications

Performance

- ▶ 2.6 Terabit Switching Fabric
- ▶ 1,905Mpps forwarding rate
- Extensive wirespeed traffic classification for ACLs and QoS
- ▶ 9KB L2/L3 Jumbo frames
- Wirespeed multicasting
- ▶ 96K MAC address entries
- ▶ Up to 96K host entries
- ▶ Up to 32K multicast entries
- ► Up to 168 Link Aggregation Groups (LAGS) any combination of static and dynamic (LACP)
- ► 4K VI ΔNα
- ▶ 4GB DDR SDRAM
- ▶ 16MB packet buffer memory
- ▶ 4GB Flash Memory
- Multicore CPU with 4 dual-threaded cores for highperformance, and enabling Vista Manager mini and AWC wireless network management

Reliability

- ▶ Modular AlliedWare Plus operating system
- ▶ Dual hot swappable PSUs with 1 + 1 redundancy
- Dual feed support: a separate power circuit can feed each power supply providing extra reliability
- ► Hot-swappable expansion modules (XEMs)*
- ► Hot-swappable fan modules
- Full environmental monitoring of PSUs, fans, temperature and internal voltages, with SNMP traps to alert network managers in case of any failure

Expandability

- Eight high speed expansion bays supporting a choice of modules for port flexibility and application versatility
- ► Versatile licensing options for additional features

Power Characteristics

- ► AC Voltage: 100 to 240V (+/-10% auto ranging)
- ► Frequency: 47 to 63Hz
- DC Voltage: 36 to 72V

Diagnostic Tools

- Active Fiber Monitoring detects tampering on optical links
- ▶ Built-In Self Test (BIST)
- ► Cable fault locator (TDR)
- ▶ Find-me device locator
- ► Hardware health monitoring
- ► Automatic link flap detection and port shutdown
- ► Optical Digital Diagnostic Monitoring (DDM)
- ▶ Ping polling for IPv4 and IPv6
- ► Port mirroring
 - » No limit on mirrored ports
 - » Up to 4 mirror (analyzer) ports
- ► VLAN mirroring (RSPAN)
- ► TraceRoute for IPv4 and IPv6
- ► Uni-Directional Link Detection (UDLD)

IPv4 Features

- ► Black hole routing
- ▶ Directed broadcast forwarding
- ▶ DNS relay
- ► Equal Cost Multi Path (ECMP) routing
- ▶ Policy-based routing
- ► Route maps

- Route redistribution (OSPF, BGP, RIP)
- ► Static unicast and multicast routing for IPv4
- ▶ UDP broadcast helper (IP helper)
- Up to 600 Virtual Routing and Forwarding (VRF lite) domains (with license)

IPv6 Features

- ► DHCPv6 client and relay
- DNSv6 client and relay
- ▶ IPv4 and IPv6 dual stack
- IPv6 hardware ACLs
- ▶ Device management over IPv6 networks with SNMPv6, Telnetv6 and SSHv6
- ▶ NTPv6 client and server
- ► Static unicast and multicast routing for IPv6
- ▶ Log to IPv6 hosts with Syslog v6
- ► IPv6 Ready certified
- ► VRF Lite

Management

- ➤ 7-segment LED provides at-a-glance status and fault information
- Allied Telesis Management Framework Plus (AMF Plus) enables powerful centralized management and zero-touch device installation and recovery
- Try AMF Plus for free with the built-in Starter license (includes network management and automation features, but not Vista Manager AMF Plus menu features)
- ► NETCONF/RESTCONF northbound interface with YANG data modelling
- Console management port on the front panel for ease of access
- ► Eco-friendly mode allows ports and LEDs to be disabled to save power
- ► Industry-standard CLI with context-sensitive help
- Out-of-band 10/100/1000T Ethernet management nort
- ► Powerful CLI scripting engine
- Comprehensive SNMP MIB support for standardsbased device management
- ► Built-in text editor
- Event-based triggers allow user-defined scripts to be executed upon selected system events
- USB interface allows software release files, configurations and other files to be stored for backup and distribution to other devices

Quality of Service

- 8 priority queues with a hierarchy of high priority queues for real time traffic, and mixed scheduling, for each switch port
- Bandwidth limiting (virtual bandwidth)
 Limit bandwidth per port or per traffic class down to 64kbps
- Wirespeed traffic classification with low latency essential for VoIP and real-time streaming media applications
- ▶ IPv6 QoS support and IPv6-aware storm protection
- ▶ Policy-based QoS based on VLAN, port, MAC and general packet classifiers
- ► Policy-based storm protection
- Extensive remarking capabilities and taildrop for queue congestion control
- Queue scheduling options for strict priority, weighted round robin or mixed scheduling
- ► IP precedence and DiffServ marking based on layer 2, 3 and 4 headers

Resiliency Features

- Control Plane Prioritization (CPP) ensures the CPU always has sufficient bandwidth to process network control traffic
- Dynamic link failover (host attach)
- ▶ Ethernet Protection Switched Rings (EPSR) with SuperLoop Protection (SLP) and EPSR enhanced recovery for extra resiliency
- ► G.8032 Ethernet Ring Protection
- Media Redundancy Protocol (MRP)
- ▶ Bidirectional Forwarding Detection (BFD)
- ► Flexi-stacking allows the use of any port speed to stack
- ► Long-Distance VCStack over fiber (VCStack LD)
- ► Loop protection: loop detection and thrash limiting
- ► PVST+ compatibility mode
- ▶ STP root guard
- ► VCStack fast failover minimizes network disruption

Security

- ► Federal Information Processing Standard Publication 140-2 (FIPS 140-2) certified
- ► Access Control Lists (ACLs) based on layer 3 and 4 headers
- ► Configurable ACLs for management traffic
- ► Dynamic ACLs assigned via port authentication
- ➤ ACL Groups enable multiple hosts/ports to be included in a single ACL, reducing configuration
- ► Auth fail and guest VLANs
- ► Authentication, Authorisation and Accounting (AAA)
- ▶ Bootloader can be password protected for device security
- ► BPDU protection
- ► DHCP snooping, IP source guard and Dynamic ARP Inspection (DAI)
- ► DoS attack blocking and virus throttling
- Dynamic VLAN assignment
- ► MAC address filtering and MAC address lock-down
- ► Media Access Control Security (MACSec)
- Network Access and Control (NAC) features manage endpoint security
- ► Learn limits (intrusion detection) for single ports or LAGs
- ➤ Private VLANs provide security and port isolation for multiple customers using the same VLAN
- ► Secure Copy (SCP)
- ► Secure File Transfer Protocol (SFTP) client
- Strong password security and encryption
- ► TACACS+ command authorisation
- ► Tri-authentication: MAC-based, web-based and IEEE 802.1x
- ► Web-based authentication
- ► RADIUS group selection per VLAN or port
- ► RADIUS Proxy

Software-Defined Networking (SDN)

 OpenFlow v1.3 with support for encryption, connection interruption and inactivity probe

Environmental Specifications

- Operating temperature range: 0°C to 50°C (32°F to 122°F)
 Derated by 1°C per 305 meters (1,000 ft)
- Storage temperature range: -25°C to 70°C (-13°F to 158°F)
- Operating relative humidity range: 5% to 90% non-condensing
- ➤ Storage relative humidity range: 5% to 95% non-condensing

6 | SwitchBlade x908 GEN2

AlliedTelesis.com

^{*} A reboot is required after hot-swapping a XEM2-1CQ with a XEM of a different type

▶ Operating altitude: 3,050 meters maximum (10,000 ft)

Electrical Approvals and Compliances

- ► EMC: EN55032 class A, FCC class A, VCCI class A
- ► Immunity: EN55024, EN61000-3-levels 2 (Harmonics), and 3 (Flicker)

Safety

- ► Standards: UL60950-1, CAN/CSA-C22.2 No. 60950-1-03, EN60950-1, EN60825-1, AS/NZS
- Certification: UL, cUL, TUV, FIPS 140-2

Restrictions on Hazardous Substances (RoHS) Compliance

- ► EU RoHS compliant
- China RoHS compliant

Feature Licenses

NAME	DESCRIPTION	INCLUDES	STACK LICENSING
AT-FL-GEN2-01	SwitchBlade x908 GEN2 Premium license	 ▶ OSPF¹ (16,000 routes) ▶ BGP4¹ (5,000 routes) ▶ PIMv4-SM, DM and SSM (2,000 entries) ▶ VLAN double tagging (Q-in-Q) ▶ RIPng (5,000 routes) ▶ OSPFv3 (8,000 routes) ▶ BGP4+ (5,000 routes) ▶ MLDv1 and v2 ▶ PIMv6-SM and SSM (1,000 entries) ▶ VRF lite (63 domains) ▶ RADIUS Full ▶ UDLD ▶ VLAN Translation ▶ G.8032 ring protection ▶ Ethernet CFM ▶ VXLAN ▶ PTP Transparent Mode 	► One license per stack member
AT-SW-APM10-1YR ^{2,3}	Cumulative AMF Plus Master license	► AMF Plus Master license for up to 10 nodes for 1 year	One license per stack
AT-SW-APM10-5YR ^{2, 3}	Cumulative AMF Plus Master license	► AMF Plus Master license for up to 10 nodes for 5 years	➤ One license per stack
AT-SW-APC10-1YR ^{2, 4}	Cumulative AMF Plus Controller license	▶ AMF Plus Controller license for up to 10 areas for 1 year	► One license per stack
AT-SW-APC10-5YR ^{2, 4}	Cumulative AMF Plus Controller license	▶ AMF Plus Controller license for up to 10 areas for 5 years	► One license per stack
AT-FL-GEN2-0F13-1YR	OpenFlow license	▶ OpenFlow v1.3 for 1 year	Not supported on a stack
AT-FL-GEN2-0F13-5YR	OpenFlow license	▶ OpenFlow v1.3 for 5 years	Not supported on a stack
AT-FL-GEN2-MSEC ⁵	MACSec license	► Media Access Control Security	► One license per stack member
AT-FL-GEN2-VLF	VRF-Lite Full license	▶ VRF lite (600 domains)	► One license per stack member
AT-SW-AWC10-1YR ⁶	Cumulative AWC license	► Autonomous Wave Control (AWC) license for up to 10 access points for 1 year	► One license per stack
AT-SW-AWC10-5YR ⁶	Cumulative AWC license	▶ Autonomous Wave Control (AWC) license for up to 10 access points for 5 years	► One license per stack
AT-SW-CB10-1YR-2022 ⁷	Cumulative AWC-CB and AWC-SC license	► AWC Channel Blanket and AWC Smart Connect license for up to 10 access points for 1 year	► One license per stack
AT-SW-CB10-5YR-2022 ⁷	Cumulative AWC-CB and AWC-SC license	► AWC Channel Blanket and AWC Smart Connect license for up to 10 access points for 5 years	► One license per stack

¹ 64 OSPF and BGP routes included in base license

Ordering Information

AT-SBx908GEN2-B0y8

High capacity Layer 3+ modular switch chassis with 8 x high speed expansion bays, fans included

AT-SBx908GEN2-J90[†]

High capacity Layer 3+ modular switch chassis with 8 x high speed expansion bays, fans included

[†] JITC approved models only available in North America. Please contact your sales representative

AT-SBxPWRSYS2-Bxy9, 10

Hot-swappable load-sharing power supply

SBxPWRSYS1-B8y10

1200W DC system power supply

AT-FAN08¹⁰

Spare hot-swappable fan module

AT-XEM2-8XSTm*

 $4 \times 1/2.5/5/10G$ RJ45 ports and $4 \times 1G/10G$ SFP+ ports

AT-XEM2-12XTm

12 x 1/2.5/5/10G RJ45 ports

AT-XEM2-12XS v2 12 x 1G/10G SFP+ ports

12 X 16/106 SFP+ por

AT-XEM2-4QS

4 x 40G QSFP+ ports

AT-XEM2-1CQ*

1 x 100G QSFP28 port

⁸Where Oy= 01 for 1 year Net Cover support 05 for 5 year Net Cover support

⁹Where xy= 1y for AC power supply with US power cord 2y for AC power supply with no power cord 3y for AC power supply with UK power cord

4y for AC power supply with AU power cord 5y for AC power supply with EU power cord

 $^{\rm 10}\,\rm Note$ that fans are included but NO power supplies ship with the base chassis, they must be ordered separately

* Please contact your sales representative for availabilty in your region

NETWORK SMARTER

² From AW+ version 5.5.2-2 onwards, AMF Plus licenses provide all standard AMF network management and automation features. They also enable the AMF Plus intent-based networking features menu in Vista Manager EX (from version 3.10.1 onwards)

Purchase one license per 10 nodes (up to 300 nodes maximum)

Purchase one license per 10 areas (up to 60 areas maximum)

⁵ MACSec only operates on the XEM2-12XS v2 and XEM2-8XSTm expansion modules

⁶ 5 APs can be managed for free. Purchase one license per 10 additional APs (up to 300 APs maximum)

⁷ Channel Blanket and Smart Connect are not available as free services. Both an AWC-CB license and an AWC license are required for Channel Blanket and/or Smart Connect to operate. Purchase one AWC-CB license per 10 APs (up to 300 APs maximum).

Accessories

SFP Modules

AT-SPTX

10/100/1000T 100 m copper

AT-SPSX

1000SX GbE multi-mode 850 nm fiber up to 550 m

AT-SPSX/I

1000SX GbE multi-mode 850 nm fiber up to 550 m industrial temperature

AT-SPEX

1000X GbE multi-mode 1310nm fiber up to 2 km

AT-SPLX10

1000LX GbE single-mode 1310 nm fiber up to 10 km

AT-SPLX10/I

1000LX GbE single-mode 1310 nm fiber up to 10 km industrial temperature

AT-SPBD10-13

1000LX GbE Bi-Di (1310 nm Tx, 1490 nm Rx) fiber up to 10 km $\,$

AT-SPBD10-14

1000LX GbE Bi-Di (1490 nm Tx, 1310 nm Rx) fiber up to 10 km $\,$

AT-SPLX40

1000LX GbE single-mode 1310 nm fiber up to 40 km

AT-SPZX80

1000ZX GbE single-mode 1550 nm fiber up to 80 km

10GbE SFP+ Modules

AT-SP10SR

10GSR 850 nm short-haul, 300 m with MMF

AT-SP10SR/I

10GSR 850 nm short-haul, 300 m with MMF industrial temperature

AT-SP10LRM

10GLRM 1310 nm short-haul, 220 m with MMF

AT-SP10LR

10GLR 1310 nm medium-haul, 10 km with SMF

AT-SP10LRa/I

10GLR 1310 nm medium-haul, 10 km with SMF industrial temperature

AT-SP10LR20/I

10GER 1310nm long-haul, 20 km with SMF industrial temperature

AT-SP10ER40/I

10GER 1310nm long-haul, 40 km with SMF industrial temperature

AT-SP10ZR80/I

10GER 1550nm long-haul, 80 km with SMF industrial temperature

AT-SP10TM

1G/2.5G/5G/10G, 100m copper, TAA¹¹

10GbE SFP+ Cables

AT-SP10TW1

1 meter SFP+ direct attach cable

AT-SP10TW3

3 meter SFP+ direct attach cable

AT-SP10TW7

7 meter SFP+ direct attach cable

40G QSFP+ Modules

AT-QSFP1CU

1 meter QSFP+ direct attach cable

AT-QSFP3CU

3 meter QSFP+ direct attach cable

AT-QSFPSR4

 $40GSR4\ 850\ nm\ short$ -haul up to 150 m with MMF, MPO-12

AT-QSFPSR4LCa

 $40 \mbox{GSR4}$ $850 \mbox{ nm}$ short-haul up to $150 \mbox{ m}$ with MMF, LC

AT-QSFPLR4

40GLR4 1310 nm medium-haul, 10 km with SMF

AT-QSFPER4

40GER4 1310 nm long-haul, 40 km with SMF

AT-MTP12-1

1 meter MTP optical cable for AT-QSFPSR

AT-MTP12-5

5 meter MTP optical cable for AT-QSFPSR

100G QSFP28 Modules

AT-QSFP28-1CU

1 meter QSFP28 direct attach cable

AT-QSFP28-3CU

3 meter QSFP28 direct attach cable

AT-QSFP28-SR4

100GSR 850 nm short-haul up to 100 m with MMF

AT-QSFP28-LR4

100GLR 1310 nm medium-haul, 10 km with SMF
